OBJECTIVE

I'm a Web Developer with a foundation in Frontend (ReactJS, NextJS, TypeScript) and Backend (.NET Core, C#), I aspire to become a Fullstack Developer Intern. I look forward to working in a professional environment to enhance my skills in requirement analysis, API development, and user experience optimization. Additionally, I am eager to learn new technologies to effectively complete assigned tasks.

SKILL

- Technical main skills: C#, .NET Core (ASP.NET Core), RESTful API, Entity Framework, OOP, SQL Server, PosgreSQL.
- Technical additional skills: Javascript, Typescript, ReactJS, Next.js, ReactNative, Mongodb, TaiwindCSS, Bootstrap, Docker, Redis, Vps, Nginx, Git.
- Soft skills: Teamwork, Time Management, Flexibility, Adaptability, Agile Scrum.

EDUCATION

2021 - 2026

Thu Dau Mot University

Software Engineering

When I was in school, I was very sociable and actively participated in school activities. I participated in community activities and scientific research projects.

WORK EXPERIENCE

10/2023 - 12/2023

Personal Project

Online Chat Web

Description: Develop a real-time messaging application similar to Zalo. Implement core features such as text messaging, posting, connecting friends, creating groups. **Technologies:** C#, .Net core MVC, SignalR, Mongodb, TaiwindCSS.

GitHub: https://github.com/nghiabatuoidev/webchat-netcoremvc-signal.git

03/2024 - 04/2024

Personal Project

Online Movie Web

Description: A movie streaming website where users can browse and watch movies.

Technologies: Next.js, ShadCN/UI, Tailwind CSS, Redux

Toolkit, API integration, Redis, Docker. **Link online:** https://motchillzz.top

01/2025 - 04/2025

Group project - Teamsize (2)

Typing Practice Website Online

Description: Online typing practice website supports multiple languages.

Responsibilities:

- Collect and analyze user requirements and market data.
- Define system requirements, data flows, and user interactions.
- Design system architecture, data models, APIs, and technology stack.
- Develop a responsive, user-friendly, multilingual interface.

Technologies:

- Frontend: Typescript, Nextjs, Redux, Hook, TaiwindCSS, Shadcn/ui.
- · Backend: .Net core API, C#, PosgreSQL, Docker.

Github:

- https://github.com/nghiabatuoidev/typingfast-nextjs.git
- https://github.com/nghiabatuoidev/typingfastnetcoreapi8.git

Link online: https://xtypingfast.com/en

- English: I can comfortably read and interpret documentation, project specifications, and work totally in English.

INTEREST

- Reading book
- Watch movie
- Football
- Listen to music
